Automation QA Engineer

Currently I work in the field of software testing (QA) as a Automation QA Engineer.

I develop and deploy automated functional tests. Test implementation with **Python** 3.x. Mainly **API** and **e2e** web application tests, some experience in **Desktop** application test automation (**pywinauto**), testing with Machine Vision (**pyautogui**).

Running tests with **pytest**, testing web applications with **Selenium**, reporting with **Allure**.

CI/CD is built on **Jenkins**, code management via **Gitlab**, test runs on **Selenoid**, metrics are sent to **Zabbix**, the entire infrastructure is deployed under **Linux**.

Manage all work tasks via **Jira**.

The last major sites where I worked were Interfax news agency and S7 Airlines.

Between projects, I deal with the current tasks of the company:

- development of a corporate **chatbot** for Telegram;
- training of new employees, preparation of documentation;
- writing articles in the field of test automation.

In free time:

- I read books in English, in order to raise my knowledge of **English** above **B1**;
- studying ISTQB, training for certification;
- writing **backend** for a web applications;
- trying to use asynchronous code.

This is my current experience, before that I worked for more than 10 years in a large enterprise as an IT / Telecom engineer, I did everything - from device installation to project management and analytics. As a result:

- friendship with Linux at a level above the user;
- administration of Windows Server (AD, DNS, DHCP, Exchange, System Center, etc.);
- virtualization based on Hyper-V, ESXi;
- networks, cable infrastructure, optics;
- telephone stations (PBX) Avaya, Hipath 4000.

EDUCATION: Diplomaed specialist, Kuban State Technological University.

PROFESSIONAL EXPERIENCE

Hopper-IT, Dubna, Russia

Automation QA Engineer(03/2021 – present day)

Caspian Pipeline Consortium Company, Novorossiysk, Russia

Telecommunication Engineer (03/2012 – 03/2021)

LLC "Starstroj", Novorossiysk, Russia

IT Specialist (10/2005 – 03/2012)

Soft skills:

- Team player: communication skills, competent approach, understanding the principle of collective responsibility;
- I know how to work with priority tasks, but I consider work / life balance important;
- Reasonable pro-activity - ready to work out key issues, but I don't do what is not needed.
